

## Solar Security Light

EnergyMatrix™ Eco-friendly Security Light is a highly dependable system and technology that provides clear lighting in a durable self-powering package for your security lighting needs. The design and materials allow better performance in increasing efficacy, extending lamp life, and lowering cost. The Solar Security Light is a popular selection for economically or environmentally conscious companies and individuals that desire a quality source of lighting. Product features include lighting effects, movement detection, customized operating range, solar panel, and lamp.

(shown here in Model SE-A2D4C1)

### FEATURES & BENEFITS

- Eco-friendly and Low Power Consumption - The Solar Security Light reduces CO2 emission and uses one-tenth the power consumption of other security lights with the equivalent lumens output. The low power consumption allows for an extended lamp life and reduces maintenance and utility costs.
- High Humidity Resistance - The light has an extremely rugged and durable design with Rain Proof IP 65 protection that can resist all weather conditions from hot to cold and humid to dry.
- Increase Safety with High Quality and Reliability - EnergyMatrix provides the Solar Security Light which self-generates power ready for use at anytime. The power source for lighting, customized setting and other devices are included for your essential safety needs.
- Easy Set Up - The unit is conveniently designed to attach to a solar panel and one or two lamps along with motion recognizing applications thus increasing the value to the product.

Model	SE-A1D4C1	SE-A2D4C1
Power Consumption	1.1 W Solar Panel	1.1 W Solar Panel
Description	1 Lamp	2 Lamps
Lamp Life	40,000 hours	40,000 hours
Operating Voltage	12 V internal	12 V internal
Dimensions	225 x 150 x 285 mm	295 x 155 x 290 mm
Gross Weight	1 Kg	1.5 Kg
Color Temperature	8,000 K	8,000 K
