

Solar Power Kit

EnergyMatrix™ proudly introduces the Solar Power Kit, a highly efficient lighting package for portable lighting needs. The kit is ideal for occasions when minimum electricity is available such as camping or as an emergency precaution for natural caused disasters. This compact device is equipped with a solar panel, two LED lights, a radio, DC output terminals and a chargeable battery. The lightweight suitcase allows the Solar Power Kit to be quickly transported from a sanctioned area to a hazardous place. The LED product contains no mercury and features a fail proof design of the highest standard for an extremely reliable source of light.

FEATURES & BENEFITS

- High Reliability - The Solar Power Kit self generates power keeping it ready for use at all times. Your power source for lighting, radio, cell phone, and other devices are all included in one lightweight case for your essential needs.
- Easy Set Up and Mobile - The unit is conveniently designed in a case with built-in AC / DC converter and USB port to charge electrical devices. The Solar Power Kit also includes an extendable handle and two wheels for easy mobility and transportation.
- Low Power Consumption- Our Solar Power Kit includes two LED lights that consume less power to provide longer lasting lighting.
- Enhanced Battery Capacity - Battery capacity is saved using the stand- ing solar panel for situations where a power outlet is unavailable. The self sustaining power kit works longer in various circumstances than other portable electronic devices with regular batteries.

Model	KIT - A4D4Z1
Power Consumption	10 W
Battery Capacity	12 V / 7 Ah
Lamp Life	40,000 hours
Operating Voltage	3V, 6V, 12V x 2
Dimensions (L) x (W) x (H)	480 x 230 x 390 mm
Gross Weight	9.2 Kg
LED Light	Two
Port and Socket	USB, Cigarette lighter
Radio	AM / FM with an alarm
